Let's start the setup; please follow the guide

- 2 Login to your hosting account <https://YOUR-HOSTING.com/>

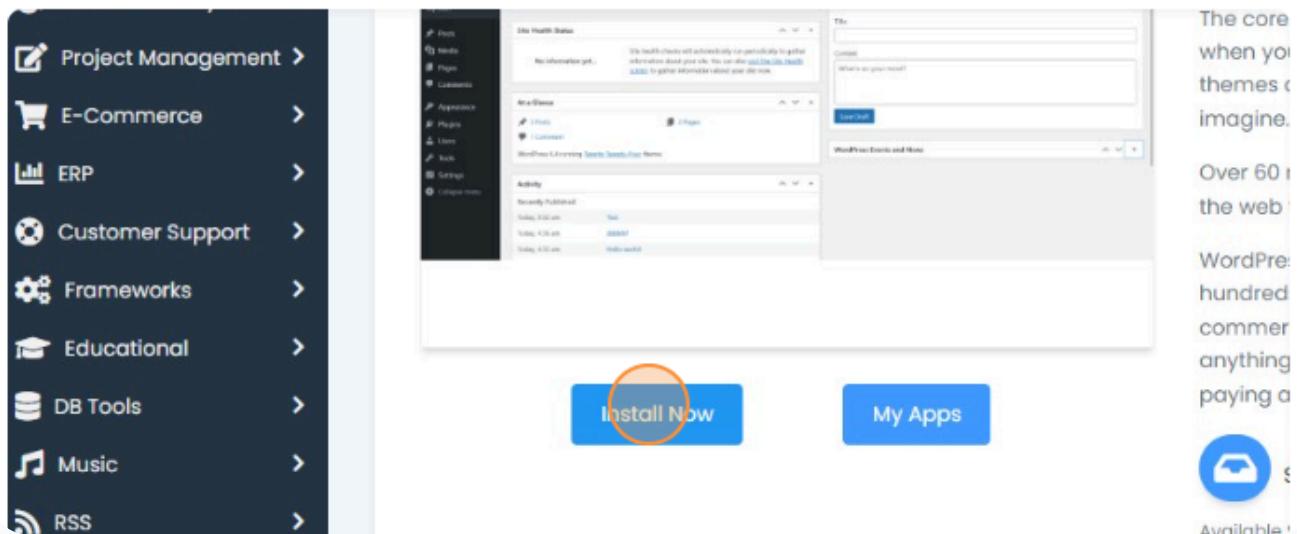

- 3 Log in to your hosting cPanel.

- 4 Now, install WordPress by scrolling down the page and clicking on **WordPress**.

5 Click "Install Now"

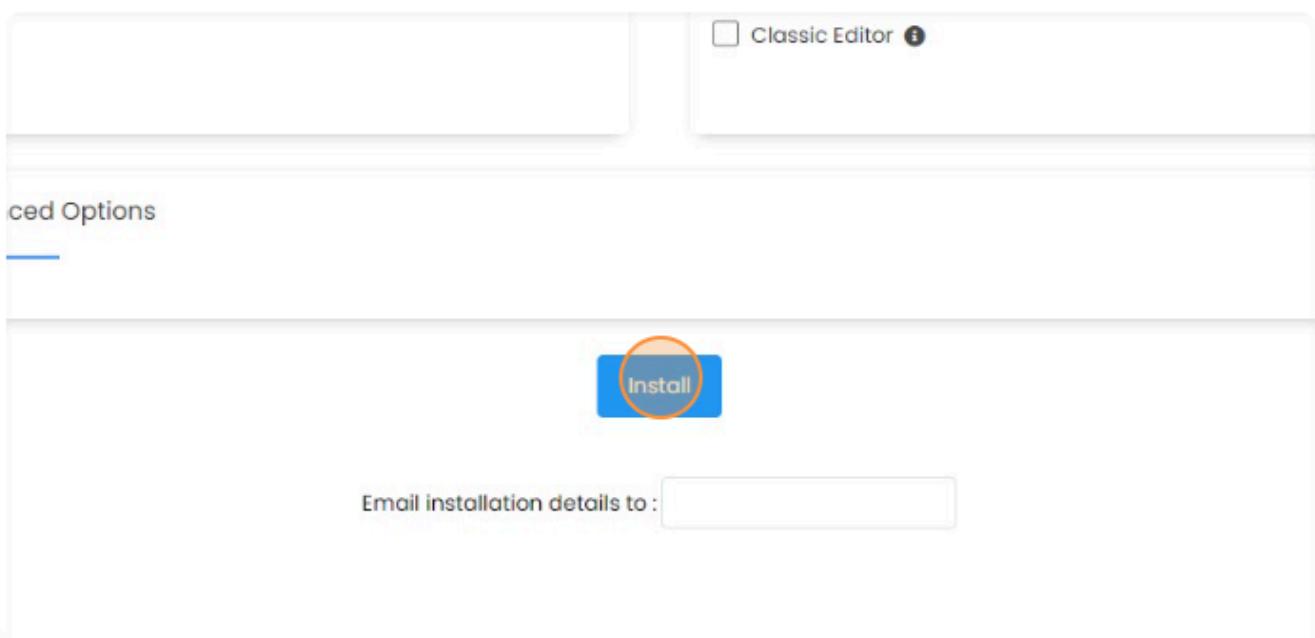

6 Choose the Domain where you want to install WordPress.

The screenshot shows the 'Software Setup' page. It has sections for 'Choose Installation URL' (with a dropdown for protocol and domain, and a note about the directory), 'Choose the version you want' (with a dropdown for version 6.5.2), and buttons for 'Site Settings' and 'Admin Account'. A large orange circle highlights the 'Your installation URL' field, which contains the value 'https://digitalblaze.pro'.

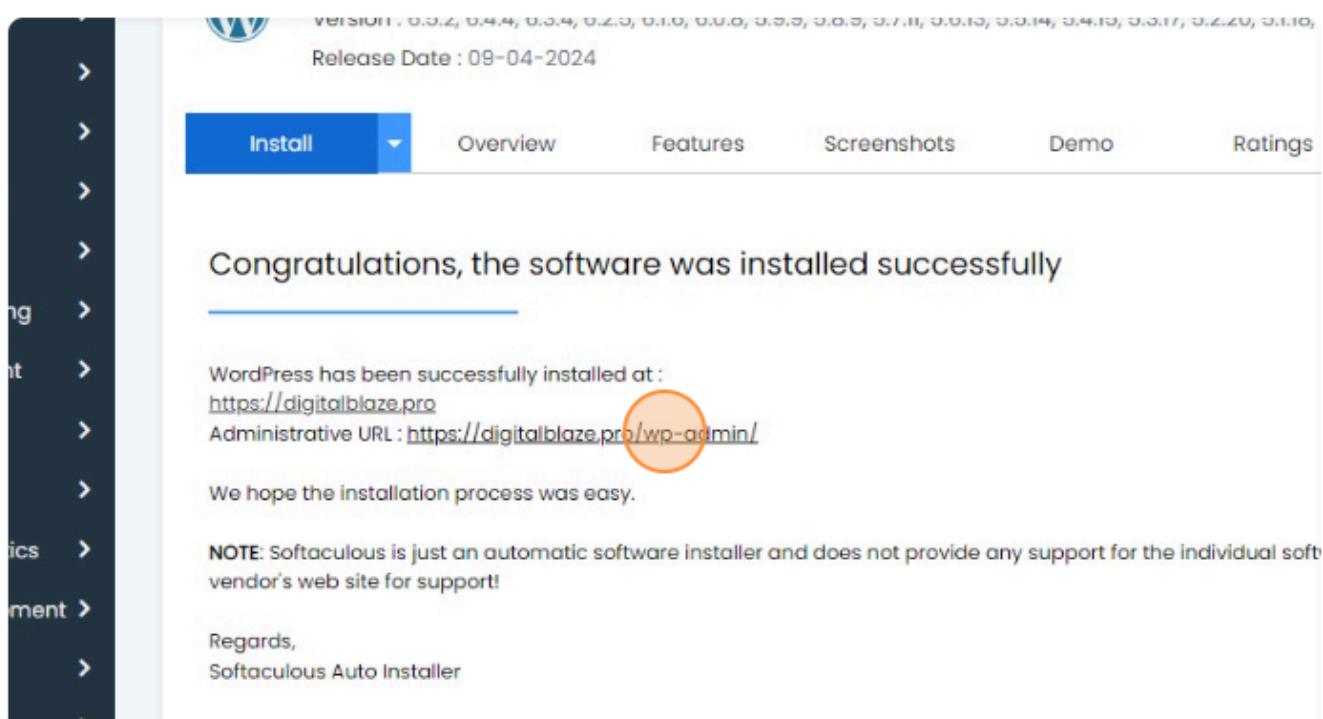

7 Please enter the necessary details.

The screenshot shows the 'Admin' setup page. It includes fields for 'Admin Password' (set to 'Pass') and 'Admin Email' (set to 'admin@digitalblaze.pro'). The 'Admin Email' field is highlighted with a red circle.

- 8 Click this button to begin the installation process.

- 9 Visit <https://Your-Domain.com/wp-admin/>

10

Hover over plugins, then click "Add New Plugin."

The screenshot shows the WordPress dashboard. On the left, there's a sidebar with links: Posts, Media, Pages, Comments, Appearance, Plugins (which is highlighted with a blue circle), Users, Tools, and Settings. The main content area has a heading 'At a Glance' with statistics: 1 Post, 1 Comment, and 1 Page. Below this is a section titled 'Installed Plugins' with a link 'Add New Plugin' (also highlighted with a blue circle). Further down are sections for Activity and Recently Published.

11

Click the "Search Plugins" field.

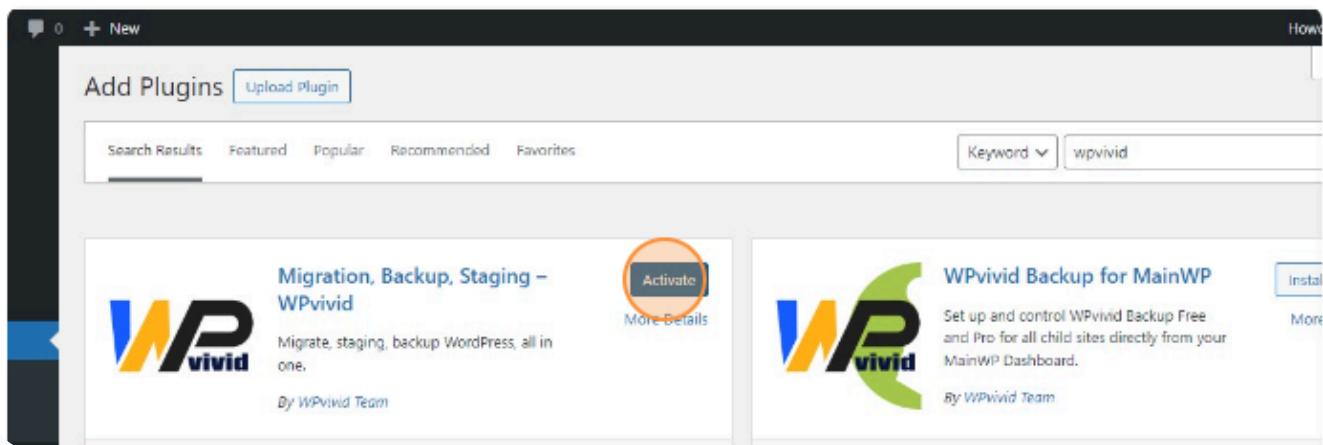

The screenshot shows the 'Plugins' page. At the top, there's a search bar with the placeholder 'Search plugins...' (highlighted with a red circle). Below the search bar, there's a message: 'You may install plugins in the [WordPress Plugin Directory](#) right from here, or upload a plugin in .zip format by clicking the button at the top.' There are two plugin cards displayed: 'Akismet Anti-spam: Spam Protection' and 'WPvivid Backup for MainWP'.

13

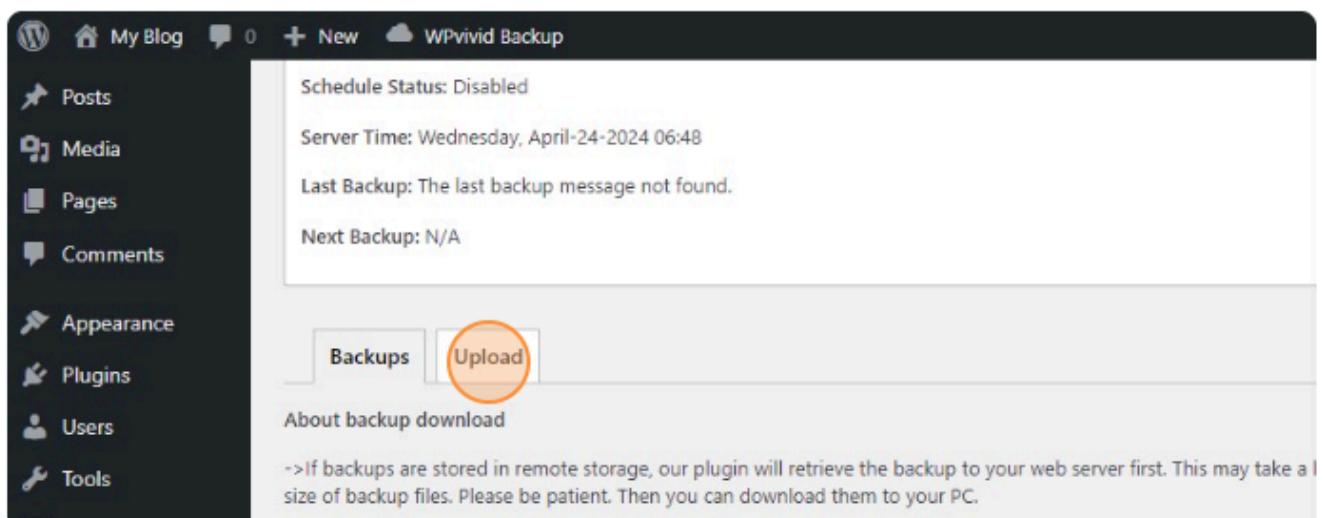

Now, search for the plugin (**Plugin Name - WPvivid**) in the "Search Plugins" field.

The screenshot shows the 'Plugins' search results for 'wpvivid'. The search bar at the top contains the text 'wpvivid' (with a red arrow pointing to it). Below the search bar, there are two plugin cards: 'Migration, Backup, Staging – WPvivid' and 'WPvivid Backup for MainWP'. Both cards have an 'Install Now' button (highlighted with a blue circle).

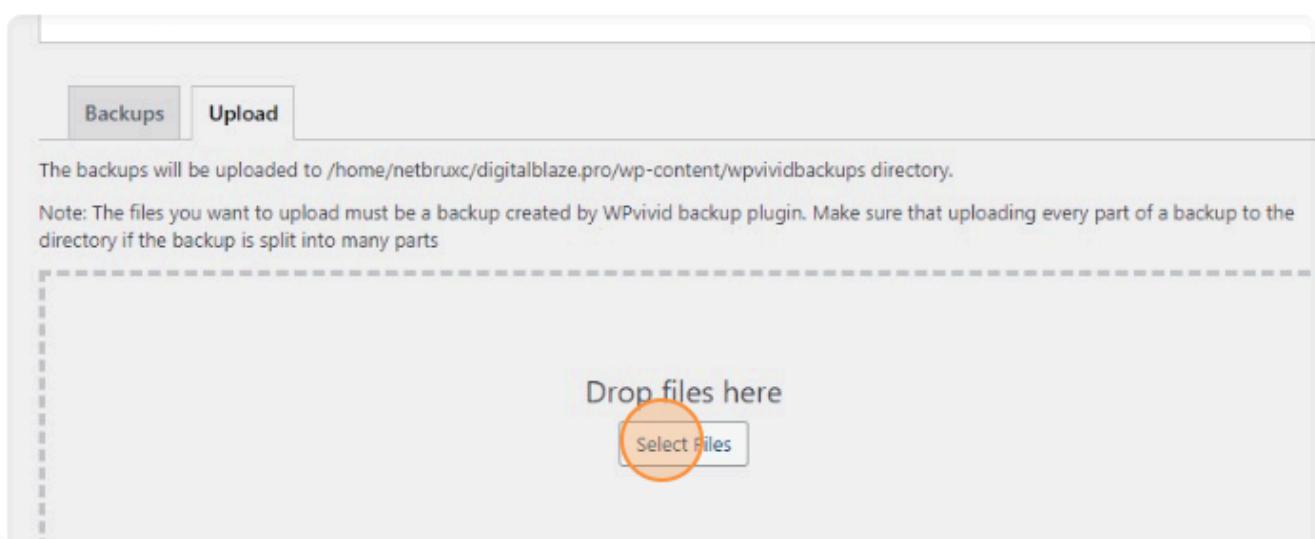

14 Click "Activate"

15 Refresh the page now. You will see and can click on "Backup Restore." Scroll down the page, and you will find the upload button. Click "**Upload**".

16 Now, click "**Select files**" and upload the website file you have just downloaded from us.

17

Click this **Upload** button.

The screenshot shows the 'WPvivid Backup' section of the WordPress dashboard. On the left, a sidebar lists 'Comments', 'Appearance', 'Plugins', 'Users', 'Tools', 'Settings', and 'WPvivid Backup'. Under 'WPvivid Backup', there are links for 'Backup & Restore', 'Database Snapshots', 'Staging', 'Export & Import', 'Image Cleaner', and 'Settings'. The main area has a heading 'The backups will be uploaded to /home/netbruxc/digitalblaze.pro/wp-content/wpvividbackups directory.' A note below it says 'Note: The files you want to upload must be a backup created by WPvivid backup plugin. Make sure that uploading every part of a backup to the directory if the backup is split into many parts'. There is a dashed rectangular area labeled 'Drop files here' with a 'Select Files' button. Below this, a file named 'digitaldownloadstore.infynic.com_wpvivid-66280c7624a4d_2024-04-24-01-01_backup_all.zip' is listed. At the bottom are 'Upload' and 'Cancel' buttons, with the 'Upload' button circled in orange.

18

Monitor the upload progress and await completion of the process.

blaze.pro/wp-content/wpvividbackups directory.
ated by WPvivid backup plugin. Make sure that uploading every part of a backup to the

The screenshot shows the same 'WPvivid Backup' interface. The 'Drop files here' area and 'Select Files' button are visible. Below them, a progress bar indicates the upload of a file named ':7624a4d_2024-04-24-01-01_backup_all.zip'. The progress bar is mostly grey with a small orange segment at the end, which is labeled '1%'. A large red downward-pointing chevron icon is centered at the bottom of the page.

19

Refresh the page now and click on "Restore."

or received backups in directory /home/netbruxc/digitalblaze.pro/wp-content/wpvividbackups

	Download	Restore	Delete
 	Download (182.72 MB)	Restore	

20

Click the **Restore** button and wait for the restoration process to complete.

The screenshot shows the WordPress dashboard with the WPvivid Backup plugin active. The left sidebar includes links for Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, and Settings. The main area has tabs for Backups, Upload, and Restore, with the Restore tab currently selected. A message at the top says "Restore backup from: Apr-24-2024 01:01". Below it, instructions advise not to close the page or switch to other pages during the restore process. A large red circle highlights the "Restore" button, which is blue with white text. The background of the main content area is light gray.

21

Now, open the product PDF you downloaded from us and copy the username and password. Then, log in to your website.

23 Click to "Visit Site"

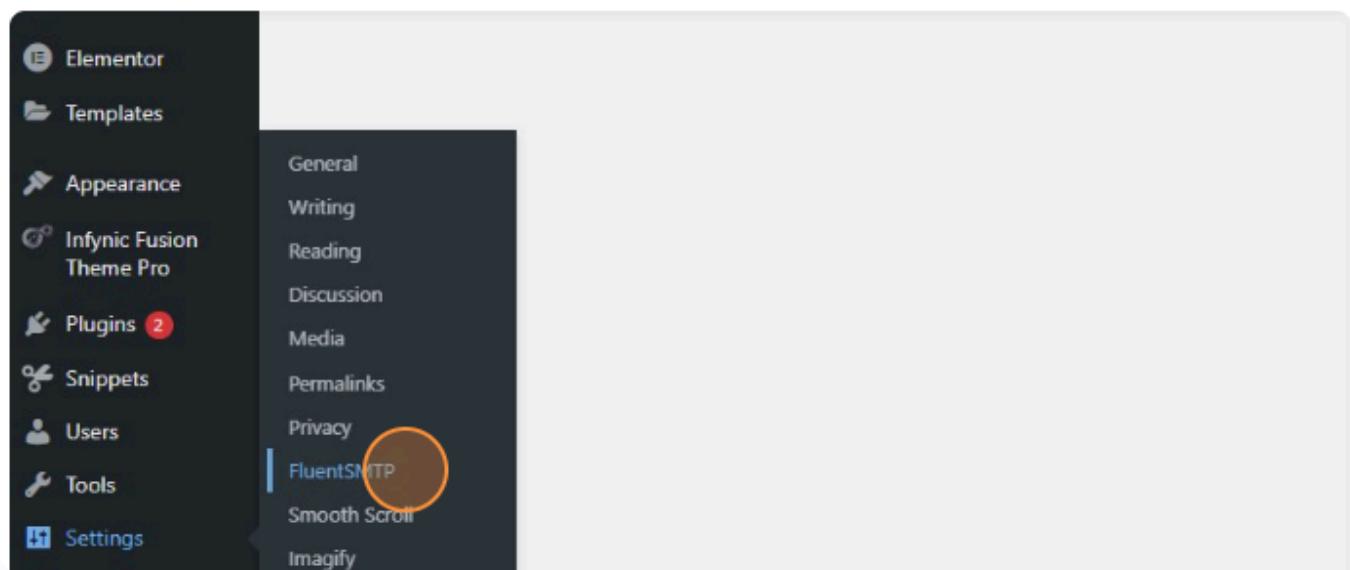

24 Congratulations! You have successfully launched your website.

let's set up your SMTP

25 Now, let's set up your SMTP. Hover over settings and click on "FluentSMTP."

26

Click "Settings"

The screenshot shows the fluentSMTP plugin settings page within a WordPress dashboard. The left sidebar includes links for Dashboard, Posts, WP Funnels, Media, Pages, Comments, and Support. The main content area has a header with the fluentSMTP logo and a message about authentication keys. Below the header are tabs for Settings, Email Test, Email Logs, Alerts, About, and Documentation. The Settings tab is highlighted with an orange circle. A section titled 'Sending Stats' displays a chart with a legend for 'By Date' and 'Cumulative'. At the bottom of the stats section is a page number '1'.

27

Click here.

The screenshot shows the fluentSMTP settings page. The top navigation bar includes a purple 'P' icon, Settings (which is active and highlighted with a blue underline), Email Test, Email Logs, Alerts, About, and Documentation. Below the navigation is a section for 'Connections' with a button '+ Add Another Connection'. A table lists an email connection: 'From Email' is 'email@yourwebsite.com' and the 'Actions' column contains three icons (edit, copy, delete). To the right of the table is a 'General Settings' panel. It includes a 'Log Emails' section with a checked checkbox 'Log All Emails for Reporting', and a 'Delete Logs' section with a dropdown menu set to 'After 14 Days'.

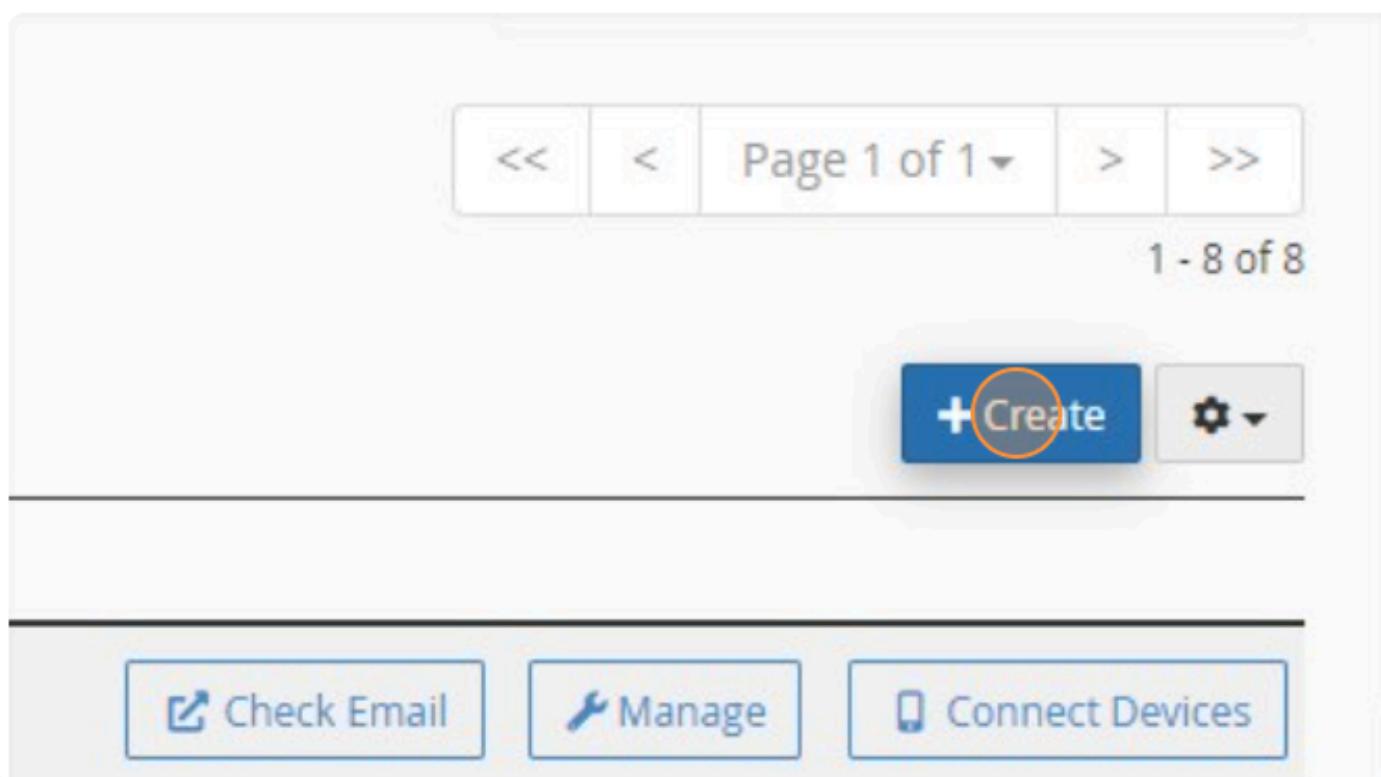

28

Click "Email Accounts"

The screenshot shows the WP Toolkit interface. On the left is a sidebar with 'Tools' and 'WP Toolkit'. The main area has several sections: 'Disk Usage', 'FTP Accounts', 'JetBackup 5', 'Email' (which is active and highlighted with an orange circle), 'Forwarders', 'Autoresponders', 'Default Address', and 'Mail'. The 'Email' section contains sub-links for 'Email Accounts', 'Forwarders', 'Autoresponders', and 'Default Address'.

29

Click "Create"

30

Choose Your Domain and Enter the Email You Desire,

Such as support@yourdomain.com, in the Username Field.

A screenshot of a domain creation or account setup form. On the left, there is a dark vertical sidebar. The main form area has a white background. At the top, there is a search bar labeled 'Search Tools (/)'. Below it, there is a 'Domain' field containing 'digitalblaze.pro' with a dropdown arrow. A note says 'Missing a domain? Check the Missing a domain? section to find out how you can create one.' In the middle, there is a 'Username' field with a placeholder 'Enter your email address's username here.' and a '@digitalblaze.pro' suffix. This input field is also circled in orange. A note below says 'Missing a domain?' with a link. Below the username field is a 'Password' section with two radio button options: 'Set password now.' (which is selected) and 'Send login link to alternate email address.'. At the bottom, there is a 'Enter Password' input field, a 'Generate' button, and a small icon. To the right of the main form, there are two sections: 'MISSING A DOMAIN?' with a 'Manage Domains' link, and 'NEED HELP?' with a 'About This Interface' link.

31 Click "Generate" to generate password

38 Enter the "From Name" field, typically your website or company name.

The screenshot shows a web interface for WPvivid Backup Imagify. At the top, there are navigation links for 'WPvivid Backup' and 'Imagify'. On the right, it says 'Howdy,'. Below the header, there's a section titled 'From Name' with a text input field containing 'yourwebsiteName'. This input field is circled in orange. Below the input field are two buttons: '(Recommended Settings: Enable) i' and 'Force Sender Name i'. There is also a link 'Set the return-path to match the From Email i'.

39 Now Copy Your Host Name mail.YourDomainName.com

The screenshot shows the 'Secure SSL/TLS Settings (Recommended)' page. It includes fields for 'Username' (support@digitalblaze.pro), 'Password' (Use the email account's password), 'Incoming Server' (mail.digitalblaze.pro, IMAP Port: 993, POP3 Port: 995), and 'Outgoing Server' (mail.digitalblaze.pro, SMTP Port: 465). The 'Outgoing Server' field is circled in orange. A note at the bottom states 'IMAP, POP3, and SMTP require authentication.'

40 And Paste Your Host Name in "SMTP Host" field.

The screenshot shows the 'WPvivid Backup Imagify' settings page under the 'Settings' tab. On the left sidebar, there are links for Appearance, Infynic Fusion Theme Pro, Plugins (2), Snippets, Users, Tools, and Settings. The 'Settings' link is highlighted with a blue bar. In the main area, there are sections for 'From Name' (support@digitalblaze.pro) and 'SMTP Host' (yourhostname). The 'SMTP Host' field is circled in orange. To the right of the 'SMTP Host' field is a 'SMTP Port' field set to '465'. At the bottom, there are options for 'Encryption' (None, SSL, TLS), with 'SSL' selected. There are also 'Force From Email' and 'Set the return-path to match the From Email' checkboxes.

41 Copy "SMTP Port: Which is 465"

Secure SSL/TLS Settings (Recommended)

Username:	support@digitalblaze.pro
Password:	<i>Use the email account's password.</i>
Incoming Server:	mail.digitalblaze.pro IMAP Port: 993 POP3 Port: 995
Outgoing Server:	mail.digitalblaze.pro SMTP Port: 465

IMAP, POP3, and SMTP require authentication.

42 Enter Your SMTP port in "SMTP Port" field.

your website Name

Recommended Settings: Enable to match the From Email

Force Sender Name

SMTP Port

465

port 465, or tls on port 25 or 587 None SSL TLS

43

Finally Click "Save Connection Settings"

The screenshot shows the FluentSMTP settings page. On the left, there's a sidebar with various menu items: Writing, Reading, Discussion, Media, Permalinks, Privacy, FluentSMTP, Smooth Scroll, Imagify, LiteSpeed Cache, WPvivid Backup, LiteSpeed Cache, and a Collapse menu. The main area is titled 'Encryption (Select ssl on port 465, or tls on port 25 or 587)' with three radio button options: None (unselected), SSL (selected), and TLS (unselected). Below this is a 'Use Auto TLS' toggle switch (on) with a descriptive note: '(By default, the TLS encryption would be used if the server supports it. On some servers, it can be forced to use SSL instead.)'. There's also an 'Authentication' toggle switch (on) with a note: '(If you need to provide your SMTP server's credentials (username and password) enable this option.)'. Two buttons are available for storing access keys: 'Store Access Keys in DB' (selected) and 'Access Keys in Config File'. Below these are fields for 'SMTP Username' (support@digitalblaze.pro) and 'SMTP Password' (redacted). A note at the bottom says 'Read the documentation for how to configure any SMTP with FluentSMTP.' Finally, a green button at the bottom right is circled in orange and labeled 'Save Connection Settings'.
